TOPICS IN EUROPEAN LEGAL HISTORY

Most contemporary legal systems derive from one or the other of the two legal orders that developed in continental Europe and in England over the course of the centuries. This course is designed to introduce students to some of the main features of the continental European or civil law tradition, a tradition that has its origins in Roman law. We spend some time as well on the English common law tradition, which began to diverge from the law of continental Europe in the middle ages, and acquired its own distinctive character. Required texts are Peter Stein's *Roman Law in European History*, Manlio Bellomo's *The Common Legal Past of Europe, 1100-1800* and a photocopy reader available at Copy Central, 2560 Bancroft Way.
